

## **Council – 8 December 2022**

### **Council Tax Support Scheme**

#### **Addendum**

Further information, as requested by the Corporate Management Committee, has been set out below for the Council's consideration.

- From the latest data and modelling of the current caseload the removal of the Additional Earnings Disregard will reduce the Council Tax Support annual spend by £9,425.
- The move to a flat rate non-dependant deduction could reduce Council Tax Support spend by £1,903 but this unlikely to be fully realised once the actual non-dependant rates for 2023 are published.
- We estimate the change to £5 minimum costs £50,000 and then is offset by the savings, down to around £40,500
